

Transcript: How to make a deposit on the DraftKings Sportsbook app (iOS)

[Percussion music playing]

Are you ready to start playing?!

In this video, we'll show you how to make a deposit to your DraftKings Sportsbook account using the DraftKings iOS app.

Open the DraftKings Sportsbook app.

It's important to know funds you deposit into one product, like Daily Fantasy, may not be available for use on another product, like Sportsbook or Casino.

Once logged in, tap the Deposit button or plus sign available at the top of the app home screen.

Any related promotions, if available, will appear at the top of the deposit window.

If you've never deposited before, first tap "Add a Payment Method" to set up your preferred deposit method.

The deposit methods available to you will depend on your location and may vary by DraftKings product.

Tap your preferred method and enter your account details.

This step will vary depending on the method you select.

Please note DraftKings account holders may not use a payment method that does not belong to them to deposit to their account.

When finished, your preferred payment method will be listed.

Next, choose a predetermined deposit amount or choose "other" to enter a different amount.

\$5 is the minimum deposit amount

Finally, slide right at the bottom of the screen to make your deposit.

A confirmation message will appear if the deposit was successful.

If your notifications are enabled, you may also receive a confirmation email. Transaction history is also available in the account menu.

Common issues with deposits can include:

Location issues, Mismatched Information, or your bank not approving of a transaction.

For more information on how to resolve deposit issues please visit our [Help Center](#).

Now get playing and good luck!
